QUESTIONS & ANSWERS

Q : Lights were working when using 12v plug. Hard wired the speaker to the battery and no the lights won't work? Tried using remote, no luck. Suggestions?

A : Try connecting it using the 12 volts plug again.

Q : I received my atv6.5bt speaker but the only Time I can get the lights on the speaker work is to start the Atv and hold the gas and it will light up but as soon as I let off there is no lights even with music no lights.

A : That is odd as the music plays. it means that there is power going in. Have you tried using the remote to switch the lights? if the lights continues to die off please check your warranty options

Q : Is it possible to get white faceplates?

A : Faceplate are not available

Q : I bought this speaker a month ago and it's been so great but my remote is not changing colors no more it lights up but doesn't change

A : Please check the battery of the remote

Q : Is there an app for this speaker?

A : There is none. Just connect via Bluetooth

Q : Can I order a new control board for this?

A : For circuit board. The unit needs to be sent in for repair

Q : How to connect the Bluetooth

A : Simply power up the unit and then pair your device

Q : the bluetooth was working fine at first and then the second time i used it i had to keep turning the system on and off and then take the battery out of the remote and put it back in before it would work again

A : If the unit is still within 30 days and has an issue. please contact the seller to arrange for a replacement

Q : How to reset Bluetooth on unit because it is not pulling up on iPhone?

A : There is no reset button on the unit. It may not be compatible with the device you are using

Q : can you link 2 together

A : The [PLATV85BT.5](#) is a stand-alone speaker system
