* If you find any part is missing in the package, please contact support@refoss.net, we will provide solution for you.

Installation Guide

1. Refoss smart garage door opener is the companion device of your existing garage door opener. Its main working principle is as follows.

2. Download the eHomeLife app and choose Smart Garage Door Opener to get start.

3. Power on the device. Wait about 5 seconds until the status LED blinks amber and green.

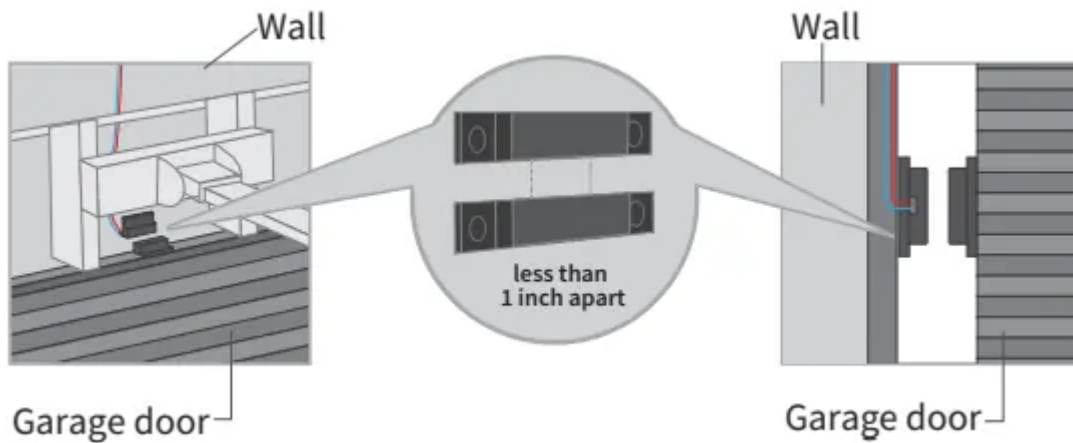

4. Connect the device to your home Wi-Fi with eHomeLife app.

5. Connect the sensor cable. Move the sensor to check if it is functional*.

*Please contact support@refoss.net for help if the sensor is not functional.

6. Find a proper position on the garage door to mount the sensors*. Please make sure the distance between the two sensors in less than 1 inch the garage door is close, and the two sensors are well separated when the garage door is open.

* You can use the included double-sided adhesive tapes or screws for sensor fixation.

7. Power off your existing parage door. Connect the other ens of the signal control cable to the two terminals that connect to the wall button. Wire order does not matter here.

8. Deploy the device. We recommend to deploy it on the top of your existing adhesive tapes for the fixation if necessary.

9. Power on both existing garage door opener and smart garage door opener. The smart garage door opener will reconnect to Refoss cloud service automatically.

Congratulations! You have completed all installation steps.

FAQ

At Refoss we strive to assure your satisfaction. Any questions about Smart Garage Door Opener please feel free to contact support@refoss.net.

1. Can I manage multiple smart garage door openers within eHomeLife app?

One smart garage door opener is for one garage door only, you can configure multiple smart garage door openers within the app.

2. What shall I do when my eHomeLife app is unable to control the added smart garage door opener?

Please check the followings:

- Check the main Wi-Fi's internet connection.
- Make sure that main Wi-Fi's password hasn't been changed.
- Factory reset the device and try to configure its Wi-Fi part again.
