SPECIFICATIONS

Operating voltage / frequency (V/Hz)	(220-240) V~/50Hz
Total current (A)	10
Water pressure	Maximum: 1 Mpa Minimum : 0.1 Mpa
Total power (W)	2100
Maximum dry laundry capacity (kg)	7
Spinning revolution (rev / min)	1200
Programme number	15
Dimensions (Height x Width x Depth) (mm)	845 x 597 x 527

INTRODUCTION OF CONTROL PANEL

DETERGENT DRAWER

You can use the liquid level determination plate when you want to wash your laundry with liquid detergent. You can use your liquid detergents in all programs without prewashing. Place the liquid detergent apparatus in the second compartment (which is available inside the machine) of the detergent drawer (*) and set the detergent amount. (Use the recommended amount of liquid detergent by detergent producers). Do not exceed the MAX level, use only for liquid detergent, do not use this apparatus for powder detergent and take it out.)

SECTIONS

Main wash detergent compartment:

In this compartment, only materials like detergent (liquid or powder), lime preventer and such can be used. You can find the liquid detergent apparatus inside your machine at first installation.

Fabric conditioner, starch, detergent compartment:

You can use softener for your laundry (recommended amount and type by the producer is recommended). Sometimes the fabric conditioners you use for your laundry may remain in this compartment. The reason for this is that the conditioner is not viscous. To prevent this situation, more viscous liquid softeners are recommended to be used or the softener could be thinned and then used.

Pre-wash detergent compartment:

This compartment must only be used when the pre-wash feature is selected. Pre-wash feature is recommended for very dirty laundry.

PROGRAM KNOB

- You can select the programme you want to wash your laundry in through programme knob.
- You may set the programme selection operation by rotating the programme knob in both directions.
- Ensure that the programme knob is exactly on the programme you want to select

ELECTRONIC DISPLAY

On the display panel, you can see the washing delay timer of your machine, temperature selection of your machine, the auxiliary functions you have selected and the stage of the programme you are running on your machine ( pre wash/ wash state,  rinsing stage,  wringing stage).

Furthermore, electronic display will warn you by means of led combinations that will turn on its display when a fault occurs on your machine and notify you of the completion of the washing programme by revealing expression of “Finished” on the display as soon as the washing programme you have selected has finished as well.

PRELIMINARY PREPARATION FOR LAUNDERING

SEPARATING LAUNDRIES

- Your laundry has product labels on them that specify their specifications. Wash or dry your laundry according to the specifications on the product label.

- Separate your laundries according to their types (cotton, synthetic, sensitive, wool etc.), their temperatures (cold, 30°, 40°, 60°, 90°) and degree of contamination (slightly stained, stained, highly stained).

- Never wash your coloured and white laundry together.
- Wash your coloured laundries separately in the first washing as they may bleed.
- Ensure that there are no metallic materials on your laundries or in the pockets; if so, take them up.

- Zip up and button up your laundries.
- Remove the metallic or plastic hooks of tulle curtains or curtains or place them in a washing net or bag and then muzzle them.

- Reverse textiles such as pants, knitwear, t-shirt and sweat suit.

- Wash socks, handkerchief and suchlike small laundries in a washing net.

 Whitening available	 No whitening	 Normal washing
 Ironing temperature is maximum 150°C	 Ironing temperature is maximum 200°C	 No ironing
 Dry cleaning available	 No dry cleaning	 Leave on a flat place
 Hang when wet	 Dry by hanging	 Drying by twirling is not allowed
 Dry cleaning in gas oil, pure alcohol and R113 is allowed	 Perchloroethylene R11, R13, Petroleum	 Perchlorinetyhlene R11, R113, Gas oil

PUTTING LAUNDRIES IN THE MACHINE

Open the door of your machine.

Spread your laundries in your machine.

Note: Maximum loading capacity may vary based on the laundry type you will wash, degree of contamination and the programme you have chosen. Do not exceed maximum dry loading capacity indicated in the programme table for washing programmes.

You can take the following table of weights as an example.

LAUNDRY TYPE	WEIGHT (gr)
Towel	200
Linen	500
Bathrobe	1200
Quilt cover	700
Pillow slip	200
Underwear	100
Tablecloth	250

- Put each item of laundry separately.
- Ensure that no laundry is stuck between the cover and bellow seal when closing the door of your machine.
- Push the door of your machine until hearing the locking sound to close it.
- Close the door of your machine properly, otherwise your machine will not start the washing operation.

ADDING DETERGENT INTO MACHINE

The amount of detergent you will put in your machine will depend on the following criteria:

- Your detergent utilization will be based on the degree of contamination of your laundries. Do not prewash your less stained laundries and put your slight amount of detergent in the 2nd compartment of the detergent drawer.
- For your much stained laundries, select a programme including prewashing, and put % of the detergent you will put in the detergent drawer in the 1st compartment of the detergent drawer while putting the remaining % of it into 2nd compartment.
- Use detergents produced for automatic washing machine in your machine. The amount of detergent you will use for your laundries is printed on the detergent package.
- The higher the degree of hardness of the water the more detergent you will use.
- The amount of the detergent you will use will increase as the amount of your laundries increase.
- Put the softener in the softener compartment in the detergent drawer. Do not exceed the MAX level. Otherwise, softener will flow into washing water through flushing.
- Softeners with high density are required to be thinned to a degree before being put in the drawer. Because high-density softener will clog the flush and avoid the flow of the softener.
- You can use your liquid detergents in all programs without prewashing. For this, fit liquid detergent level plate in the accessories bag or the liquid detergent apparatus (*) into 2nd compartment of the detergent drawer and set the amount of liquid detergent according to the levels on this plate. Remember to detach the liquid detergent plate. (*)

OPERATING YOUR MACHINE

- Plug your machine in.

- Open the water faucet.

- Open the machine door.
- Spread your laundries in your machine.
- Push the door of your machine until hearing the locking sound to close it

Selecting programme

Select the convenient programme for your laundries on the programme table.

AUXILIARY FUNCTIONS

Before starting the programme, you can optionally select an auxiliary function.

- Press on the button of auxiliary function you would like to select.

- If auxiliary function symbol on electronic display flashes continuously, the auxiliary function you have selected will be activated.
- If auxiliary function symbol on electronic display blinks, the auxiliary function you have selected will not be activated.

HALF-LOAD DETECTION SYSTEM

Your machine features a half-load detection system.

In case you put approximately half or less amount of laundry of maximum laundry capacity in your machine, your machine will run so as to save washing time, water consumption and energy in some programmes. When the halfload function is active, the machine can complete the programme you have set in a shorter time

AUXILIARY FUNCTIONS

1- Delay timer

By using this auxiliary function, you can make your machine to start the washing operation with delays between “3h, 6h, 9h, 12h”

To use auxiliary function of delayed start:

- Press the delayed start button once.
- “3 h” led shall appear.
- Press on delayed start button until the time, on which you want washing operation to be started.
- To activate the time delay you have selected in the programme, you may press on any auxiliary function button you like except “Start/ Pause” button.

If you have skipped the time delay you want to set, you can go back to the time desired by keeping pressed on time delay button.

If you want to cancel the time delay, you just have to press the time delay button until all of the time adjustment leds on the display panel turn off.

To run time delay function, your machine is required to be operated by pressing on Start/Standby button.

2- Temperature selection

You can select the washing water temperature with the washing water temperature adjustment button. When you select a new programme, there won't be any display on the temperature adjustment leds on the display panel.

When you press the temperature adjustment button, the max. temperature value of the programme you have selected shall appear on the led display panel.

You can gradually decrease the washing water temperature between the maximum washing water temperature of the selected programme and cold washing  selections by pressing temperature adjustment button.

If you have missed the washing water temperature you wanted, you can return to the intended temperature by continuously pressing the washing water temperature adjustment button.

3- Easy ironing

You can enable your laundries to be taken out less wrinkled as the washing operation is completed by employing this auxiliary function.

You may make the programme active by pressing the easy ironing auxiliary function button when the led light of the  symbol turns on.

4- Anti-Allergic

In the programmes where this auxiliary function is active, you may have your machine perform an extra rinsing operation on your laundries prior to latest rinsing operation.

You may make the programme active by pressing the anti-allergic button on the display panel

when the led light of the  symbol turns on.

Start/Pause button

By pressing on the Start/Pause button, you may start the programme you have selected or suspend a running programme. If you switch your machine to the standby mode, the Start/Pause led on the electronic display will blink.

CHILD LOCK

To avoid programme flow from being affected if programme buttons are pressed or programme button is turned when performing washing operation in your machine, child lock is available. Child lock will be activated in case pressed on both auxiliary functions 3 and 4 at the same time for more than 3 seconds. You can see the auxiliary function leds on the display when activated.

If pressed any button while child lock is active, the Additional Function Leds will blink on the display. If while the child lock is engaged and any programme is running, the programme knob is switched to the STOP position and another programme is selected, the programme previously selected continues from where it left. To deactivate it, it will be sufficient to press on the same buttons for more than 3 seconds. When the child lock is deactivated, the Additional Function Leds will blink on the display.

CANCELLING PROGRAMME

If you want to cancel any programme running:

1. Switch the programme knob to “STOP” position.
2. Your machine will stop the washing operation and the programme will be cancelled.
3. To get rid of the water accumulated in the machine switch the programme knob to any programme.
4. Your machine will perform the necessary discharge operation and cancel the programme.
5. You can run your machine by selecting a new programme.

FINISHING PROGRAMME

Your machine will stop by itself as soon as the programme you have selected finishes.

- End led will blink on the display panel.

- You can open the machine's door and remove the laundry.
- Leave the door of your machine open to allow the inner part of your machine to dry after removing your laundries.
- Switch the programme knob to STOP position.

- Unplug your machine.
- Turn the water faucet off.

TROUBLESHOOTING

All repairing operations required for your machine should be carried out by our authorised service. If your machine requires a repair or if you cannot remove the fault by the help of the information provided as follows:

- Unplug your machine.
- Turn the water faucet off

FAULT	POSSIBLE CAUSE	TROUBLESHOOTING
Your machine does not start.	It is not plugged.	Plug it.
	Fuse blown..	Replace the fuses.
	Electricity cut-off.	Check mains power.
	Start/pause button not pressed.	Press on Start/ Pause button.
	Programme dial 'stop' position.	Switch the programme button to the desired position.
	The machine door is not completely closed..	Close the machine door.
Your machine does not intake water.	Water tap is turned off.	Turn your faucet on.
	Water inlet hose may be twisted.	Check water inlet hose and untwist.
	Water inlet hose clogged.	Clean water inlet hose filters. (*)
	Valve inlet filter clogged.	Clean the valve inlet filters. (*)
	The machine door is not completely closed..	Close the machine door.

	Discharging hose clogged or twisted.	Check the discharging hose, then either clean or untwist.
Your machine does not discharge water.	Pump filter clogged.	Clean the pump filter. (*)
	Laundry settled in the machine unevenly	Spread your laundry in the machine evenly.
	The feet of your machine have not been adjusted.	Adjust the feet on your machine. (**)
	Safety stays fitted for transportation not disassembled.	Disassemble the safety stays of your machine. (**)
	Less amount of laundry in the appliance.	This will not block operation of your machine.
Your machine vibrates.	Your machine is overloaded with laundry or laundry settled unevenly..	Prevent your machine from resting on hard surfaces.
	Your machine rests on a hard surface.	Prevent your machine from resting on hard surfaces.

<p>Excessive foam is formed in the detergent drawer.</p>	<p>Excessive amount of detergent used.</p>	<p>Press on Start/Pause button. To eliminate foam formation, mix a spoon of softener with half litres of water, and pour the mixture in the detergent drawer. After 5-10 minutes, press on Start/Pause button again. In your next washing operation, Adjust the detergent dose accordingly.</p>
	<p>Wrong detergent used.</p>	<p>Use detergents produced only for automatic washing machines in your machine.</p>
	<p>The contamination degree of your laundries does not match the programme you have chosen.</p>	<p>Select the programme appropriate for the contamination degree of your laundries. (See programme table)</p>
<p>Unsatisfactory washing result.</p>	<p>Amount of detergent used insufficient.</p>	<p>Adjust the amount of detergent based on the amount and contamination degree of your laundries.</p>
	<p>Laundries in excess of maximum capacity put in your machine.</p>	<p>Load your machine with laundries, amount of which will not exceed maximum laundry capacity.</p>

Unsatisfactory washing result.	Water being hard. (Contaminated, lime water etc.)	Adjust the amount of detergent based on the instruction of detergent manufacturer.
	Laundries distributed in your machine nonhomogenously.	Spread your laundries in the machine properly and homogeneously.
As soon as the machine is loaded with water, water discharges.	The end of water discharging hose is too low for the machine.	Set the water discharging hose on appropriate height. (**)
No water appears in the drum during washing.	No fault. Water is in the unseen part of the drum.	
Laundries have detergent residues on them.	Non-dissolving particles of some detergents may stick to your laundries as white spots.	Perform an extra rinsing by setting your machine to "Rinsing" programme, or clean the spots using a brush after your laundries dry.
Grey spots appear on the laundries.	The reason for such spots may be oil, cream or ointment.	Apply the maximum amount of detergent instructed by the detergent manufacturer in the next washing operation.
Spinning operation is not performed or runs late.	No fault. Unbalanced load control system has been activated.	Unbalanced load control system will try to spread your laundries homogeneously. Wringling operation will begin after your laundry is spread. Place the laundry in the machine in a balanced fashion the next time.

AUTOMATIC FAULT WARNINGS AND WHAT TO BE DONE

Your machine is equipped with the systems which are capable of both taking necessary precautions and warning you in case of any breakdown by means of continuous self-checking during washing operations.

TROUBLE CODE	POSSIBLE FAULT	WHAT TO DO
	<p>The door of your machine is left open.</p>	<p>Close the machine door. If your machine persists to indicate fault, turn off your machine, unplug it and contact the nearest authorised service immediately.</p>
	<p>The water pressure or the water level inside the machine is low.</p>	<p>Turn on the faucet. Mains water may be cut-off. If the problem still continues, your machine will stop after a while automatically. Unplug the machine, turn off your faucet and contact the nearest authorised service.</p>
	<p>The pump is faulty or pump filter is clogged or electrical connection of the pump is faulty.</p>	<p>Clean the pump filter. If the problem persists, contact the nearest authorised service. (*)</p>
	<p>Your machine has excessive amount of water.</p>	<p>Your machine will discharge water by itself. Pursuant to discharging operation, turn off your machine and unplug it. Turn off your faucet and contact the nearest authorised service.</p>
