

FEATURES AT A GLANCE

Features may vary according to model

CONTROLS

Freezer Temperature Adjustment

The freezer control can be left at the factory pre-set (RECOMMENDED) or adjusted as desired.

- Adjust temperature gradually: adjust the knob in small increments, allowing the temperature to stabilize.
- For colder temperatures, adjust the knob towards COLDER.

- For warmer temperatures, adjust the knob towards COLD.

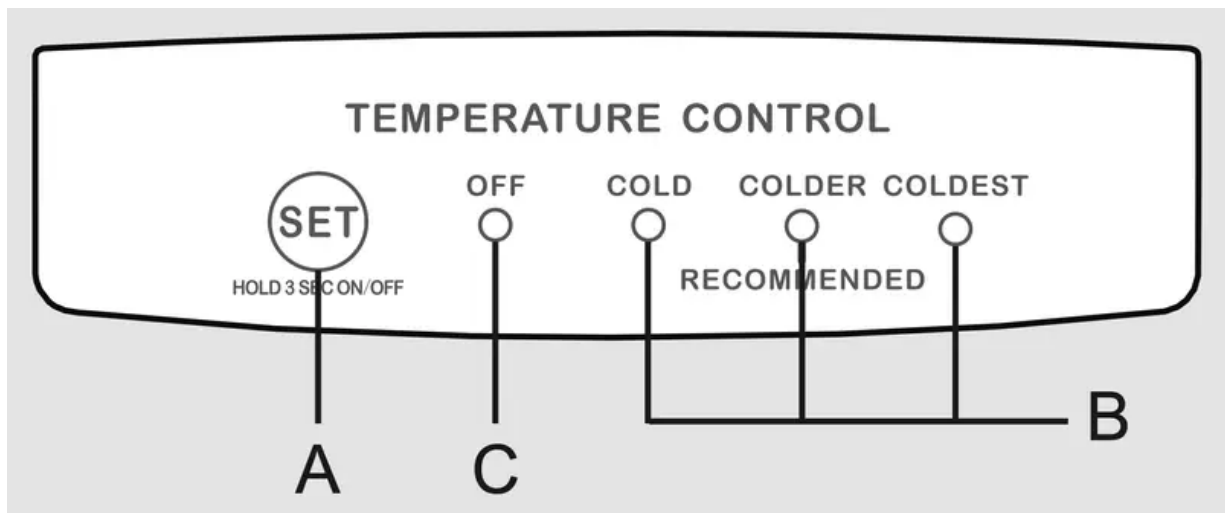

Freezer Control

Refrigerator Temperature Adjustment

The refrigerator control can be left at the factory pre-set (RECOMMENDED) or adjusted as desired.

- Adjust temperature gradually allowing the temperature to stabilize.\
- For colder temperatures, use the SET key and choose COLDER.
- For warmer temperatures, use the SET key and choose COLD.

Refrigerator Control

A. SET - Push the SET key to change between COLD, COLDER (RECOMMENDED), and COLDEST temperatures.

B. COLD, COLDER (RECOMMENDED), COLDEST - Indicates the setting of the refrigerator compartment by LED indicator lights.

C. OFF - To turn the power off, press and hold the SET key for 3 seconds. The OFF indicator light will be on.

To turn the power on, press and hold the SET key for 3 seconds. The power will turn on and the power indicator light on the control panel will turn off.

OPTIONAL FEATURES

CAUTION: Do not clean glass shelves or covers with warm water when they are cold. Shelves and covers may break if exposed to sudden temperature changes or impact, such as bumping. Tempered glass is designed to shatter into many small, pebble-size pieces. This is normal. Glass shelves and covers are heavy. Use both hands when removing them to avoid dropping.

Shelf Adjustment

Refrigerator shelves are easily adjusted to suit individual needs. Before adjusting the shelves, remove all food.

To adjust shelves:

1. Remove shelf by raising the back of the shelf out of side rail, then continue to remove shelf by pulling forward.
2. To replace shelf, rest side edges on any pair of shelf rails and carefully push shelf back into position and engage in the side rail stop.

Glass Shelf

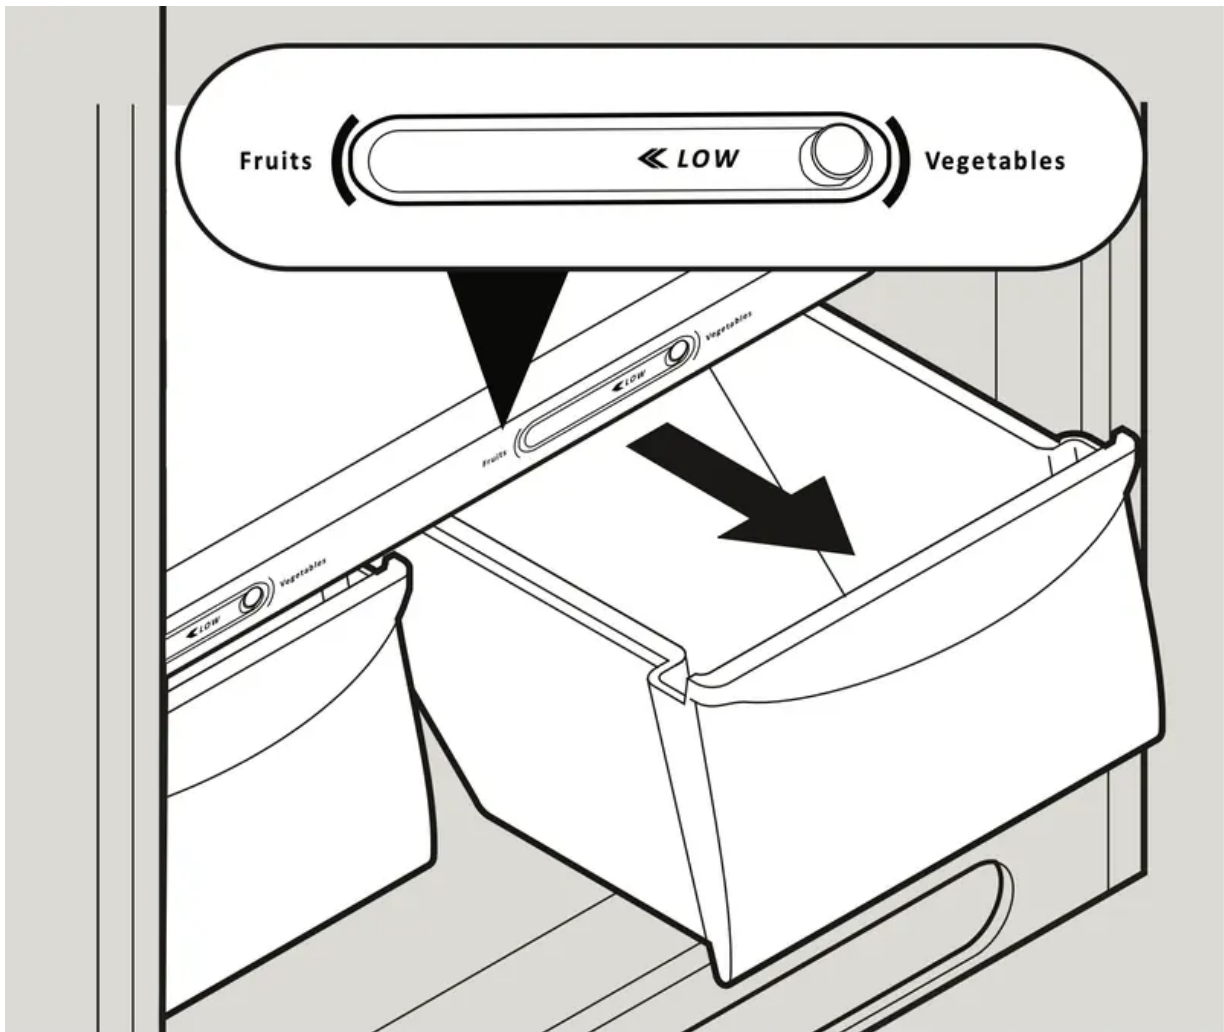

Door storage

Door bins, shelves, and racks are provided for convenient storage of jars, bottles, and cans. Frequently used items can be quickly selected.

The dairy compartment, which is warmer than the general food storage section, is intended for short term storage of cheese, spreads, or butter.

Crisper Humidity Controls

The crisper humidity controls, present on the crisper drawers of some models, allows you to adjust the humidity within the crisper. This can extend the life of fresh vegetables that keep best in high humidity.

Crisper Humidity Controls

NOTE: Leafy vegetables keep best when stored with the Humidity Control set on High Humidity, or in a drawer without a Humidity Control. This keeps incoming air to a minimum and maintains maximum moisture content. Store non-leafy vegetables and fruits still in their skins at the low humidity setting.

Crispers

The crispers, located under the bottom refrigerator shelf, are designed for storing fruits, vegetables, and other fresh produce. Wash items in clear water and remove excess water before placing them in the crispers. Items with strong odors or high moisture content should be wrapped before storing.

Crispers

CARE & CLEANING

Part	What To Use	Tips and Precautions
Interior & Door Liners	<ul style="list-style-type: none"> • Soap and water • Baking soda and water 	Use 2 tablespoons of baking soda in 1 quart of warm water. Be sure to wring excess water out of sponge or cloth before cleaning around controls, light bulb or any electrical part.
